

The Politainer : Closed System

The lightweight packaging solution

The Politainer system is a unique closed filling system, available from 1l – 30l, with UN approval for the sizes from 3l – 30l, which can – depending on your needs – directly be linked to a (filling) machine by means of different connectors. We also offer versions for diagnostic applications as well as for liquids which need a protection/barrier against permeation.

Features

- Emptying without air ingress
- Complete draining without gurgling
- Various closure solutions / adaption options to couplings
- Produced with 50-75% less plastic than an equivalent rigid plastic container
- Inverted and stacked for less storage and transport costs
- Space for individual design
- E-commerce on demand

Physical data Drawings are available on request.
