

The Politainer

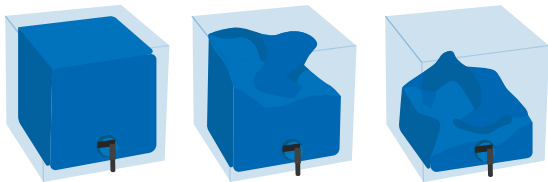

The lightweight packaging solution

The Politainer from 1l – 30l is a combination package of a flexible inner bag and a strong outer cardboard case, the sizes 3l – 30l being available with UN approval and determined for the transport of hazardous goods (packaging group II and III) but also applicable for the requirements of e.g. pharmaceutical/diagnostic markets as well as for filling goods which need a protection against permeation by means of a special EVOH/PA barrier.

Different accessories like taps, screw caps with or without tamper evidence as well as several connecting systems for “closed system” (prevents contamination) or “refill” solutions are available.

Handles can be offered for the sizes of 5l, 10l, 15l as well as 20l. Depending on the size of bag, different neck diameters (31 / 50 / 63mm) and neck types (metric or US” winding) are also available.

Drawings are available on request.

The inner flexible bag adapts itself to the remaining fill level.

Features and benefits

- Produced with 50-75% less plastic than an equivalent rigid plastic container
- Inverted and stacked for less storage and transport costs
- Accessory range
- Complete draining without gurgling
- Emptying without air ingress
- Space for individual design
- E-commerce on demand
